

# Seasons To A School Garden Planning Your Year

There are basically three sections of the year for a school garden

## Fall

### New garden

*September or earlier* - establish site and basic plan

*September* - break ground

*September, October or early November* - test and amend your soil

### Established garden

*September, October or early November* - test and amend soil if it is within the first three years and you still have mineral discrepancies, otherwise just amend

*September, October, into November* - harvest

*September, October, into November* - save seeds

*November* - clean the garden and put to bed

## Winter

*January and February* - plan what to plant

*February* - obtain seeds and tools

## Spring

*March-early spring* - start seeds

*April, May and June* - plant the garden

*As soon as garden is planted* - establish care regime

*May to early June* - establish summer care regime
